

About:

Focus on Energy empowers the people and businesses of Wisconsin to make smart energy decisions with enduring economic benefits.

Since 2001, Wisconsin's energy efficiency and renewable resource program has stayed true to that mission statement.

On behalf of 107 Wisconsin electric and natural gas utilities, Focus on Energy's information, resources and financial incentives benefit all Wisconsinites by implementing energy efficiency and renewable energy projects that otherwise wouldn't happen, or in some cases years sooner than scheduled.

Focus Light Bulb Pack

LED Lights:

LEDs use at least 75% less energy than incandescent bulbs, producing less heat and more light per watt. Plus, they have an extremely long life span of 15,000 hours (up to 13.7 years).

High Efficiency Showerheads:

Efficient showerheads lower the gallons of water used per minute, without compromising performance – allowing you to use less water, and potentially lowering water and heating bills.

Focus Flood Light Pack

Focus Foxxed Showerhead Pack

Faucet Aerators:

These simple screw-in aerators reduce water use in your sinks while providing the pressure you need to wash. Reducing your water use will save you money on the cost of heating your water.

Focus Decorative Lighting Pack

Focus Hand Showerhead Pack

Pipe Insulation Wrap:

Insulating domestic hot water pipes is one of the easiest and most cost effective measures you can do. Pipe insulation will help to reduce heat loss by up to 80 percent through hot water pipes and will stop sweating on cold water pipes.

Focus Pack with APS

Hot Water Temperature Card:

In most homes, the temperature water tanks are set to tends to be higher than what would be necessary. This water temperature card allows you to see whether or not the proper settings are in place, which help lead to savings on your water heating costs.

Advanced Power Strip:

Advanced power strips will automatically power off peripheral devices on a home entertainment system when the television is turned off, eliminating energy consumption from sound systems, gaming systems, DVD players, and similar electronics when not being used.
